High-Touch Logistics for Singapore & Beyond

Ye Heng Logistics Pte Ltd

Singapore | 2025

The Modern Supply Chain Demands Human-Verified Visibility

"In an industry of automated replies, we pick up the phone."

Established logistics giants prioritize volume, sacrificing visibility and personalized communication. Your shipments become just another ticket in the system.

YeHeng Logistic was founded to bring the 'Concierge' concept to logistics. We combine dedicated internal assets with a vetted partner network for superior service quality.

We are not an app; we are your external, dedicated logistics department.

The Hybrid Model: 100% Control, Maximum Scale

Combining dedicated assets with a vetted partner network for superior service quality.

The Core Fleet

For your most time-sensitive and critical movements, we deploy our internal team. This ensures 100% control and accountability.

The Vetted Network

For scale and reach, we orchestrate Singapore's best freight forwarders, managed entirely by us.

One invoice, one point of contact, and guaranteed service quality across all operations.

The Concierge Service: Radical Visibility (Human-Verified)

We spot and solve problems before you even know they exist.

Land Transport & Last-Mile Excellence

Our drivers represent your brand at the delivery point.

Local Distribution

Reliable and secure last-mile delivery across Singapore, ensuring your products reach customers safely and on time.

Cross-Border Trucking

Seamless and compliant transport between Singapore and Malaysia, with full regulatory compliance and professional handling.

Driver Training

Our team is trained not just to drive, but to uphold your brand's professional image at every delivery point.

Optimized for Industries Where Failure is Not an Option

*Your dedicated logistics desk, filtering the noise
and delivering solutions.*

High-Value Retail

Where security, careful handling, and brand reputation are paramount.

Events & Exhibitions

Where "late" means complete failure and missed opportunities.

Marine & Urgent Spares

Where every minute of delay costs significant money.

The ROI

By ensuring on-time, secure, and proactively managed logistics, we reduce your risk, save you management time, and protect your brand's reputation.

Global Reach & Tactical Precision

Managing your freight from origin to destination, regardless of size or complexity.

International Freight

Global Forwarding Network

We leverage vetted Tier-1 partners to move your freight anywhere in the world.

We Handle the Paperwork

Managing customs clearance, permit declarations, and cross-border documentation ownership for you.

Project & Specialized Cargo

For Awkward, Valuable, or Urgent Cargo

Our Core Fleet manages shipments that require special handling and precision.

Hands-On Coordination & Supervision

We provide route surveys, OOC transport coordination, and direct on-site management.

Proven Performance: Real-World Solutions

Moving beyond theory to deliver
precision in high-stakes environments.

Project Overview

Coordinated time-sensitive delivery of specialized racing equipment for the Singapore Grand Prix, requiring precision logistics and 24/7 monitoring.

Project Overview

Managed first-mile logistics for G.E.M.'s Singapore concert tour, handling sensitive audio equipment, stage components, and time-critical setup requirements.

Project Overview:

Sumec container trucking operations for in-gauge and out-of-gauge (OOG) cargo in Singapore, covering import collection from port terminals, delivery to customer sites, and empty container returns. A detailed end-to-end workflow review with safety and compliance assessment.

Prudence for Advancement: Managing High-Stakes OOG Logistics

14+

Operational Challenges Mastered

< 5.99M / 4.49M

Absolute hard limits for road transport. Exceeding triggers mandatory police escorts and road surveys.

2:00 PM

Strict daily deadline for next-day trucking notice to eliminate cascading schedule disruptions.

Threat vs. Mitigation Diagnostic Matrix

Threat 1: Sudden OOG Dimensions & Equipment Access.

Containers unexpectedly exceeding 6M height, or sloped site entrances preventing access for specialized 0.8m/0.6m lowbeds.

Tactical Response: Mandatory advance road surveys and customized lowbed routing coordinated directly with authorities.

Threat 2: Last-Minute Shifts & Documentation Gaps.

Missing escort permits or same-day driver shifts due to space constraints causing immediate delays.

Tactical Response: 100% advance document readiness before escort booking; proactive driver deployment adjustments.

Threat 3: On-Site Execution Hazards. Absent banksman, communication barriers, and insufficient lighting during night parking.

Tactical Response: Mandatory on-site banksman briefings, strict safety-first communication protocols, and dedicated lighting assessments.

Innovation for Excellence: End-to-End Operational Precision

Phase 1: Initiation & Verification

01. Receive job order from customer

Verification: 100% compliance verification of all documentation (DO, BL, Permit, NOA, CIPL) against PortNet.

Proactive Control: Advise customer on vessel ETA/ETB/ETU and port free storage limits (strictly 72 hours from COD) to prevent demurrage charges.

Phase 2: Deployment & Monitoring

Steps 09–15: Active Transport

Active Transit: Deploy trucking on confirmed date. Real-time driver monitoring and continuous ETA updates to PIC.

Site Coordination: Driver staging and strict banksman coordination upon site arrival. Verify storing orders and empty status before offloading.

Phase 3: Reconciliation

19. Issue invoice with all supporting documents attached

Cycle Finalization: Deploy driver for empty container return, collect DHC and extra receipts. Complete reconciliation of PSA, depot, and standby charges for transparent, gap-free billing.

Precision Under Pressure: F1 Logistics for the Singapore Grand Prix

The High-Stakes Challenge

Zero Margin for Error

Transporting high-value racing equipment requires extreme precision and specialized handling.

Rigid Time Constraints

Logistics must align perfectly with the strict schedule of the Grand Prix.

Strategic Action & Flawless Execution

24/7 Monitoring & Coordination

Implemented a tracking system and dedicated team for constant oversight.

Bespoked team

Implemented a tracking system and dedicated team for constant oversight.

100%

100% Success Rate

Achieved 100% on-time delivery with zero damage to equipment.

Sustained Excellence

Performance earned a contract renewal for three consecutive years.

Orchestrating the Stage: A High-Stakes Logistics Success Story

The High-Pressure Challenge

35 TONS OF SPECIALIZED GEAR

Massive volume of sensitive audio equipment and stage components requiring expert handling.

6-HOUR SETUP WINDOW

A critical, narrow timeframe for delivery and full stage installation.

STRATEGIC EXECUTION & RESULTS

PHASED DELIVERY & 24/7 TRACKING

Implemented specialized transport vehicles and real-time coordination with venue management.

45 MINUTES AHEAD OF SCHEDULE

Efficiency gains allowed for early completion of all setup requirements.

ZERO DAMAGE OR TECHNICAL ISSUES

Flawless execution despite the sensitivity of the concert equipment.
